Roy Chen

Cheating? Where? How?

The screenshot shows a Canvas LMS course page. At the top, there's a navigation bar with 'Home' and 'Modules'. Below it is a histogram titled 'Thumb' with a x-axis from 40 to 90. A blue vertical bar at 60 represents the mean, and a red vertical bar at approximately 65.1 represents Zelda's thumb length. A text overlay says: 'The mean of thumb length is shown in blue, and Zelda's 65.1 mm thumb is shown in red.' Below the histogram, there's a section titled 'Combining Mean and Standard Deviation' with a text block and a writing assignment area. The assignment asks: 'Say you have a video game called Kargle. A friend of yours says that their high score is 37,000 points. Is that a good score? How do you know? What else would you want to know to answer this question?' There's a text input field, a word count indicator (0 Word(s)), and a 'Submit' button. At the bottom, there are 'Previous' and 'Next' buttons, and a status bar with battery and network icons.
